FIRST TIME EVER!!

**Advanced HOTS
class to be held in
Arlington, Texas!**

Lead Instructor: Mo Pinel

With the completion of the research project on the dynamic specifications of drilled balls, we have added the final piece to the ball motion study. We now understand why balls roll the way they do! Now, you can learn it too.

Curriculum includes:

- History of bowling
- Understanding the bowling environment
- The art of fitting including performance standards
- The science of ball dynamics
- Understanding modern bowling balls
- Understanding the effect of drilling techniques
- Understanding Dual Angle Layouts and the Gradient Line technique
- Using the deTerminator properly
- Understanding the USBC ball analysis form
- And more....

3 Full Days of: Hands
On
Training in every
Subject
